

INTERLIBRARY LOAN PILOT PROGRAM ELIGIBILITY GUIDELINES

Beginning September 1, 1999, all libraries in California meeting the *Library of California Interim Eligibility Standards* (attached) are eligible to participate in the expanded pilot multitype interlibrary loan program. Public libraries may now be reimbursed for loans to special libraries that are not eligible under CLSA but *are* eligible under the Library of California. Non-public libraries that meet the LoC eligibility standards may be reimbursed for loans to all other California libraries that meet the same standards.

Please note that libraries must still have a fixed location in California. Loans to out-of-state libraries are not reimbursable.

The following list contains libraries that have been used in past years as examples of libraries not eligible under CLSA and therefore not eligible for interlibrary loan reimbursement. However, under the expanded Library of California pilot program, these libraries now *are* eligible for inclusion in the program and for reimbursement, provided they meet the Library of California *Interim Eligibility Standards*.

These are examples. The list is not meant to be all-inclusive. Any library meeting the Library of California *Interim Eligibility Standards* is eligible.
